

Which streaming services are involved

Problems we may have

Misc.

Features

Design

netflix

How would we stay up to date with shows? Gather data?

Getting rights to shows

No business needed but could be monetized

For mobile, laptop/ computer, or TV use?

random show/movie button?

Interactive (think roku screensaver?)

Dark mode

Hulu

may be too cluttered and have too much data

How would we advertise to user's?

Subscription based model for more features?

Account Sharing

customization? kids account/ personal account/ family account/ ect

how do we want the services to be separated? (like under tabs, buttons, folders)

color scheme?

hbo max

Will streaming services let us scrape their data?

No service like it but apple tv has a feature very close?

Customization

screenshare/ co-op mode

App/Website

ect...

Personal library that you can keep up with shows you have watched.

Add friends see what others are watching/ social feed

Sharing shows to social media (facebook, twitter, insta)

notifications for when new shows are out
