

Which streaming services are involved	Problems we may have	Misc.	Features	Design
netflix	How would we stay up to date with shows? Gather data?	*Getting rights to shows*	For mobile, laptop/ computer, or TV use?	random show/movie button?
Hulu	may be too cluttered and have too much data	Subscription based model for more features?	Account Sharing	Interactive (think roku screensaver?)
hbo max	Will streaming services let us scrape their data?	No service like it but apple tv has a feature very close?	Customization	Dark mode
ect...			Personal library that you can keep up with shows you have watched.	color scheme?
			Sharing shows to social media (facebook, twitter, insta)	App/Website
